SUBJECT INDEX, VOLUME 77

ACTH, and adrenal responsiveness, 461
changes in adrenal polysomes after, 128
effect on serum calcium and citrate levels, 108
effects of TRF on, 797
and midbrain transection, 1091
secretion of, feedback loop in control of, 392
Actinomycin D effect on homeostasis of plasma calcium, 375
ADH, cerebral control of secretion of, 597
maximum response to, 496
Adrenal, depression after oophorectomy, 1048
function of, relation of ovary to, 902
regulation of, in steroid-sterilized rat, 406
responsiveness of, effect of ACTH on, 461
Adrenal cortex, and norethynodrel, 155
sodium deprivation and, 1043
Adrenal cortical necrosis, 177
Adrenal polysomes, changes after ACTH, 128
Adrenals, of twins, steroid metabolism in, 602
Aging rats, reduced neurohypophysial function in, 948
Aldosterone secretion, by adrenal glands of PTU-treated rats, 777
feedback in, 501
Allograft rejection, effect of synthetic progestational agents on, 897
Ampulla, egg movement through, 114
Analogs, thyroxine, new assay procedure for, 802
Androgen, renal T_4 retention and, 879
treatment by, in infancy, effect on adult, 585
Androstene derivative, persistent effects of synthetic, 1105
Anemia in hypophysectomized rats, 977
Antibody production, circulating, effect of synthetic progestational agents on, 897
Antithyrotoxic substances, mechanism of action of some, 433

Blood flow, hypophysial, after destruction of pituitary stalk, 183
Brain, extracts of, LH-releasing activity in, 667
ovulation by copper in, 963

Calcium, bone, effect of thyroid activity on exchange of, 582
effect on parathyroid secretion, 725
exchange of, effect of thyrocalcitonin on, 1151
homeostasis of, in thyroparathyroidectomized dogs, 985
Calorigenis, dinitrophenol-induced, in hypothyroid rats, 991
Catecholamines, endogenous, induction of pseudopregnancy by depletors of, 485
and thyroid hormone, 278
CBG sex difference in rat, 841
Cellular compartments of thyroid, 825
Chick, stimulation of gonadotrophin secretion in, 756
Chloride, radioautographic studies of, in thyroid glands, 818
Chromatography, carboxymethylcellulose, urinary LH separable by, 1085
recovery of inorganic iodide by, 401
Citric acid, prostate, estrogen effect on, 1068
Clomiphene citrate effect on thyroid, 491
CNS influence on MSH secretion, 45
Cockerels, LH assay of plasma of, 651
plasma and pituitary LH levels in, 731
Cold effect on thyroid activity, 968
Collagens in cortisone-treated rats, 785
Corpora lutea, effect of LH and ovarian hormones on, 337
Corticoids, natural and synthetic, effects on transfusional shock in rat of, 954
topical activities of, 625
Corticosteroids, urinary, patterns of, thyroxine effect on, 361
Corticosterone effect on lipids in hypophysectomized male chickens, 221
Corticotrophin, assay of, in dexamethasone-treated rats, 366
Cortisol, inhibition of lymphocytolytic activity of, by hepatectomy, 574
Cortisone, effect on collagens and urinary hydroxyproline, 785
role in prevention of gonadal inhibition, 395
Coumestrol effectiveness on reversal of castration changes in anterior pituitary, 247
Cupric sulfate, ovulation induced by implantation of, into brain, 963

Dehydrogenase, α-glycerophosphate, in human pars tuberalis, 320
11β-hydroxysteroid, inhibition of activity, 325
steroid, and hemicastration, 909
Deoxyribonucleic acid, in "light cells" of thyroid gland, 218
Dexamethasone, assay of corticotrophin in rats treated with, 366
Diabetes, alloxan-, uterine glycogen levels, 209
effect on response to thyroxine, 707
fatty acid synthesis in rats with, 137
hydrocortisone, tissue nucleotides in, 467
pituitary and fat metabolism in, 547
Diabetes insipidus, hereditary, neurohypophysial principles in, 701
neurosecretion in, 692
Diet effect on hepatic and serum inactivation of insulin, 49
Dinitrophenol, effect of, on pituitary-thyroid activity, 382
on thyroid hormones, 192
DIT, dehydrogenation of lactic acid analogue of, 28
L-DIT, effect of nicotinamide on, 32
Drugs, effect on anesthetic action of steroids of, 952

Eggs, transport of, in relation to pseudopregnancy, 114

Electrophoresis, paper, recovery of inorganic iodide by, 401
Enovid in early pregnancy, 873
3β-Enzyme, inhibitor of, 1105
Epinephrine, effect of, on heart of frog, 716
metabolic changes induced by, effect of nucleotides on, 188
Esterase, nonidentity of, in rat thyroid, 415
Estradiol effectiveness on reversal of castration changes in anterior pituitary, 247
Estrogen(s), effect of, on pituitary, 247
on prostate citric acid, 1068
Estrous cycle, effect of removal or stimulation of olfactory bulbs on, 213
HCG effect on, 508
Estrus, constant, induced by constant light, gonadotrophin content of pituitaries of rats in, 529

Fatty acid synthesis, effect of insulin on, 137
Feedback in aldosterone secretion, 501
Follicular cell in dog hypophysis, 1053
Frog, arginine vasotocin effects in, 716
Fructose, content of, in rat prostate, estrogen effect on, 1068
levels, in hamster sex accessory organs, 1147
FSH, assay of, characteristics of tannate complexes of HPG in, 943
bovine pituitary, 124

GH, pituitary, depletion of, by hypothalamic extracts, 759
serologic relatedness of, 563
release of, and starvation, 455
releasing activity of, 390
releasing factor of, purification of, 932
and testosterone effects in hypophysectomized rats, 852
Glucocorticoids, effects *in vitro*, 356
Glycogen, cardiac, age and sex variations, 409
liver levels of, in alloxan-diabetic rats, 209
Glycogenolysis, rate of uterine, 917
Gonad, fetal rabbit, testosterone synthesis by, 273
Gonadotropin(s), human pituitary, assay characteristics of tannate complexes of, 226
characteristics of tannate complexes of, in FSH assay, 943
tannation effect on, 766
ova and zygote transport in mice treated with, 635
and ovarian phosphorylase, 423
placental, effect of progesterone on pituitary and ovarian responsiveness to, 921
stimulation of secretion of, in chick, 756
timing of release of, 5
Granulosa cells, action of LH on, 332
Growth, and hypothalamus, 241
Gyrus, cingulate, effects on insulin secretion of stimulation of, 617

Hamster, lactating, histologic transformation of ovary of, 641
HCG, luteotropic action of, 508
Hemicastration and steroid dehydrogenase, 909
Hen, laying cycle of, LH levels during, 889
Hepatectomy, inhibition of lymphocytolytic activity of cortisol by, 574
HGH and prolactin, 1023
Hormone(s), activity of luteinizing, ovarian ascorbic acid depletion test for, 1143
follicle stimulating and luteinizing, from male urine, further purification of, 1149
neurohypophysial, and renal excretion, 1097
ovarian, effect on corpora lutea of, 337
Hydroxyproline, urinary, of cortisone-treated rats, 785
Hypertrophy, compensatory, effect of androgen treatment in early infancy on, 585
Hypocalcemic activity, effects of antibodies to porcine thyrocalcitonin on, 520
Hypophysectomy, effect on lipid metabolism, 547
and urine concentration, 496
Hypophysectomized rats, anemia in, 977
impaired ventral prostate affinity for testosterone in, 1119
Hypophysiotrophic area of rat hypothalamus, hormone secretion of anterior pituitary transplanted into, 343
Hypophysis, dog, follicular cell in, 1053
Hypothalamic extracts, GH releasing activity of, 390
Hypothalamo-pituitary "island," 553
Hypothalamus, and growth, 241
and PMS-induced ovulation, 255
and prolactin release, 315
rat, PIF content of, 1037
pituitary transplants into, 446
regulation of TSH release from pituitary, 609

^{131}I uptake measurements in rabbits, 285
Illumination, continuous, gonadotrophins of rats in, 529
pituitary LH in rats exposed to, 1140
Insecticides, effect on anesthetic action of steroids of, 952
Insulin, effect on fatty acid synthesis, 137
liver and serum inactivation of, 49
secretion of, effects of stimulation of cingulate gyrus on, 617
Inulin, radioautographic studies of, in thyroid glands, 818
Iodine adaptation effects on thyroid iodide transport mechanism, 940
Iodoproteins, particulate, in rat thyroid, 537

Kidney, rat, inactivation of PTH by slices of, 428

Lactic acid analogue of DIT, dehydrogenation of, 28
LH, action on isolated granulosa cells, 332
human, effect of tannation of, 588
levels of, in laying hens, 889
molecular weight of, 78
and ovarian homones, effect on corpora lutea of, 337

pituitary, in rats exposed to continuous illumination, 1140
in plasma of adenohypophysectomized cockerels, 651
plasma and pituitary levels in cockerels, 731
urinary, separable by carboxymethylcellulose chromatography, 1085
in vitro biosynthesis of, 264
LH-releasing activity in brain extracts, 667
Lipids, effect of corticosterone on, in hypophysectomized male chickens, 221
Lipoproteins, isolation of, from thyroxine-labeled human serum, 398
Liver, metabolism of, parathyroid extract and, 683
rat, sex difference in, 1075
LtH and stalk section, 658
Luminal compartments of thyroid, 825
Lymphocytolysis, liver and, 574
Lysine vasotocin in pig pineal gland, 812

Mammary gland and norethynodrel, 162
Melanocyte-stimulating hormone, secretion of, influence of CNS on, 45
Metabolic changes and nucleotides, 188
Metabolism, effect of thyroid hormones on, 19
lipid, effect of hypophysectomy on, 547
steroid, in twin adrenals, 602
Midbrain transection and ACTH, 1091
Mitrochondrial structure, effect of thyroid hormones on, 61
Mitochondrial swelling and puromycin, 223
MRL 41 effect on thyroid, 491

Nelson, W. O. (1906–1964), 1
Nerves and reproductive function, 1014
Nicotinamide, effect on L-DIT, 32
Norethynodrel, and adrenal cortex, 155
doses required to prevent implantation after ovulation, 873
and mammary gland, 162
Nucleotides, in hydrocortisone diabetes, 467
and metabolic changes, 188
pyridine, in thyroid, 290

Olfactory bulbs, influence on estrous cycle, 213
Oophorectomy, adrenal depression after, 1048
Ouabain effects on thyroid iodide transport mechanism, 940
Ova transport in immature mice, 635
Ovarian activity, cyclic, influence of uterus on, 412
Ovary, of lactating hamster, histologic transformation of, 641
relation to adrenal function of, 902
Ovulation, by copper in the brain, 963
cycles of, in chickens, 5
PMS-induced, and hypothalamus, 255
Oxidation, fatty acid, by thyroid cells, 103
of substrates, by isolated thyroid cells, 863

^{32}Pi, thyroxine effect on incorporation of, 37
Parathyroid extract and liver metabolism, 683
Parathyroid hormone, ^{131}I-, half-life of, 198
renal inactivation of, 428
and thyrocalcitonon, 375
Parathyroid secretion, effect of calcium on, 725
Pars tuberalis, α-GPD in human, 320
PBI, particulate thyroidal, 537
Phospholipids, mitochondrial, role of thyroid in synthesis of, 37
Phosphorus, plasma inorganic, variations with age and sex, 409
Phosphorylase, ovarian, and gonadotropin, 423
Pineal gland, pig, lysine vasotocin in, 812
Pineal transplants, functional, 1061
Pinealectomy, reversal of effect of, by pineal transplants, 1061
Pituitary(ies), anterior, transplanted into rat hypothalamus, hormone secretion of, 343
TSH release from, 609
estrogenic effects on, 247
gonadotrophin content of, in rats in constant light, 529
transplants of, into rat hypothalamus, 446
Pituitary glands, anterior, hormone secretion of, after interruption of nervous pathways to hypophysiotropic area of, 553
follicular cell in pars distalis of, 1053
human, fractionation of, 1126
in vitro biosynthesis of luteinizing hormone in anterior, 264
Pituitary stalk, hypophysial blood flow after destruction of, 183
Plasma, LH assay of cockerel, 651
Polysomes, adrenal, changes after ACTH, 128
Pregnancy, early, effect of Enovid on, 873
and protein-free diet, 999
Progesterone, inhibition of spermatogenesis by, 203
and placental gonadotrophins, 921
prevention of steroid-induced sterility by, 859
7-^{3}H-progesterone, estrogen and androgen production from, 735
Progestins, immune suppression by, 897
Prolactin, and HGH, 1023
preparation of, 150
release of, and hypothalamus, 315
Prolactin-inhibiting activity of hypothalamus, effect of nursing and stress on, 1037
Propylthiouracil effect on aldosterone secretion, 777
Prostate, rat, estrogen effect on citric acid and fructose content of, 1068
Protease, neutral, nonidentity of, in rat thyroid, 415
Protein, deficiency of, in rat thyroid, 87
pregnancy in rats in absence of dietary, 999
Pseudopregnancy, induction of, by depletors of endogenous catecholamines, 485
transport of eggs in relation to, 114
Puromycin and mitochondrial swelling, 223

Rat, Gunn, thyroid hormone and, 303
Renal excretion, neurohypophysial hormones and, 1097
Reproductive function, nerves and, 1014
Reserpine, decreased deiodinating activity after pretreatment with, 278

effect of, on prolactin-inhibiting activity of rat hypothalamus, 315
pseudopregnancy induced by, 485

Salicylate, effect of, on L-thyroxine metabolism, 475
and thyroid function, 674
Secretion, ADH, cerebral control of, 597
Serotonin suppression of ovarian activity, 937
Sex difference, in CBG in rats, 841
in rat liver, 1075
Shock, transfusional, effects of natural and synthetic corticoids on, 954
Shwartzman-Sanarelli phenomenon, lesions resembling those of, 177
Sodium deprivation and adrenal cortex, 1043
Spermatogenesis, progesterone inhibition of, 203
Stalk section and LtH, 658
Starvation and GH release, 455
Sterility, steroid-induced, progesterone prevention of, 859
Steroids, adrenal, physiological significance of effects of, 356
bio-assay for antiphlogistic and thymolytic activities of, 625
drug and insecticide effects on anesthetic action of, 952
rat ovarian, 735
Stromal compartments of thyroid, 825
Sulfate, radioautographic studies of, in thyroid glands, 818

Testosterone, and growth hormone effects, in hypophysectomized rats, 852
impaired hepatic excretion of, 750
rapid effect on RNA polymerase activity, 763
synthesis of, by fetal rabbit gonad, 273
ventral prostate affinity for, 1119
Thiouracil contamination of uracil, 946
Thyrocalcitonin, antibodies to, 520
effect on calcium exchange, 1151
and parathyroid hormone, 375
Thyroid, activity of, effect on bone calcium exchange, 582
effect of cold on, 968
effect of clomiphene citrate on, 491
function of, and salicylate, 674
and tyrosine, 295
inulin, SO_4^- and Cl^- spaces of, 825
pituitary-, effect of dinitrophenol on activity of, 382
pyridine nucleotides in, 290
rat, effects of protein deficiency in, 87
nonidentity of esterase and neutral protease in, 415
particulate iodoproteins in, 537
regulation of, in steroid-sterilized rat, 406
Thyroid cells, fatty acid oxidation by, 103
isolated, substrate oxidation by, 863
Thyroid gland, deoxyribonucleic acid content of "light cells" of, 218
Thyroid hormone(s), and catecholamines, 278
DNP effect on, 192
effect on metabolism, 19
and Gunn rats, 303
and mitochondrial structure, 61
pituitary tumor response to, 96
Thyroid lobes, prelabeled, intrathyroidal iodinated substances released during incubation of, 1135
Thyroid protein, sedimentable, and TSH, 54
Thyroid radioautographs, 818
Thyroparathyroidectomized dogs, calcium homeostasis in, 985
Thyrotropin, effect of, on iodoprotein of thyroid cell fractions, 54
Thyroxine, and corticosteroid patterns, 361
deiodination of, effects of vitamin deficiency on, 169
effect of, on incorporation of ^{32}Pi, 37
excretion rate of, effect of antithyrotoxic substances on, 433
malic and GPD responses to, 707
sex difference in renal retention of, 879
L-Thyroxine, effect of salicylate on metabolism of, 475
in subcalorigenic doses, 991
Thyroxine assay procedure, 802
TRF, animal and human, effect on thyrotropin release, 609
effects of, on TSH and ACTH, 797
purified hypothalamic, influence on TSH levels, 792
TSH, effects of TRF on, 797
levels, of, increased by TRF, 792
in mouse blood, 745
and sedimentable thyroid protein, 54
Tumor(s), functional pituitary, TSH in blood of mice with, 745
pituitary, response to thyroid hormone, 96
production of, in ovary, 754
Twins, steroid metabolism in adrenals of, 602
Tyrosine and thyroid function, 295

Uracil, goitrogenic and hypercholesterolemic effects of, 946
Uric acid metabolism, sex difference in, 1075
Urine, concentration of, and hypophysectomy, 496
male, further purification of hormones, 1149
Uterine horns of spayed rats, glycogen levels in, 917
Uterus, influence on cyclic ovarian activity, 412

Vasopressin, effect of, on serum calcium and citrate levels, 108
genetic defect for synthesis of, in DI rats, 701
Vasotocin, arginine, effects on cardiovascular system of frog, 716
lysine, in pig pineal gland, 812
Vitamin deficiency and thyroxine metabolism, 169

Weight, molecular, of LH, 78

Zygote transport in immature mice, 635
